The NDSS is administered by Diabetes Australia

Continuous Glucose Monitoring (CGM) Device Summary

How do you want to connect to your CGM device?

With my pump
- Which pump do you use?
  - **Tandem t:slim X2** → Dexcom G6 OR Dexcom G7
  - **mylife YpsoPump** → Dexcom G6 OR FreeStyle Libre 3 Plus
  - **Omnipod 5**[7] → Dexcom G6 OR Dexcom G7 OR FreeStyle Libre 2 Plus
  - **Medtronic Minimed 780G** → Medtronic Guardian Link (4)

With a CGM receiver
- Dexcom G6 or G7 Receiver[4] OR Freestyle Libre 2 Reader[5]
- Dexcom G6 Transmitter OR FreeStyle Libre 2 Reader[5]

With my smartphone
- Dexcom G6 or G7 app[1] OR Medtronic Guardian app[2] OR FreeStyle LibreLink app[3]
- Dexcom G6 or G7[6] OR Medtronic Guardian System (4) Transmitter[6]

1. For information about compatible Apple iOS and Android devices for use with Dexcom G6 or G7 visit: dexcom.com/en-AU/compatibility/
2. For information about compatible Apple iOS and Android devices for use with the Guardian System (4) visit: medtronic-diabetes.com.au/mobile-apps-supported-devices
3. For information about compatible Apple iOS and Android devices for use with FreeStyle Libre visit: freestylelibre.com.au/glucose-monitoring-system/support.
4. The Dexcom receiver is an alternative to using a compatible iOS or Android device and does not require cellular data or Wi-Fi connectivity. It is not subsidised through the NDSS and can be purchased separately through AMSL. For more details, visit amsldiabetes.com.au/shop.
5. The Freestyle 2 Reader is an alternative to using a compatible iOS or Android device and does not require cellular data or Wi-Fi connectivity. However, it doesn't provide continuous glucose readings – instead, the sensor needs to be scanned using the Reader to see the current glucose reading, the latest 8 hours of glucose data and a trend arrow. NDSS registrants can obtain a FreeStyle Libre 2 Reader for free - for more details, visit freestylelibre.com.au/replacement
6. Medtronic Guardian and Dexcom G6 or G7 must be synced to a compatible Apple IOS or Android device with Bluetooth connectivity. After syncing the apps will function without cellular data or Wi-Fi connectivity. However, for sharing services to work you will need access to regular cellular data or Wi-Fi connectivity.
7. Access to subsidised Omnipod products through the NDSS requires the person with diabetes to have an active registration with Insulet Australia as an Omnipod user.

The NDSS

Provides a range of support services, information, and subsidised products to help manage your diabetes, stay healthy and live well. Go to ndss.com.au or call the **NDSS Helpline on 1800 637 700** for more information.
